

## KICKSTART YOUR RECOVERY IN 2026

This intensive program offers in just a few days what might otherwise take months in individual therapy. Blending psychological insight with Catholic spirituality, it guides participants through a transformative process of healing and renewal.

Because sexual addiction is both psychological and spiritual, this program combines evidence-based clinical practice with a Catholic understanding of the human person. Its immersive, faith-filled format fosters deep connection, accountability, and breakthrough—whether you're feeling stuck or just beginning the journey.
